PROJECTS

GradePilot — Academic Result Analytics Application

React, Node.js, MongoDB, Better Auth
Live: grade-pilot-mj.vercel.app | GitHub: github.com/jonaedjoshim/GradePilot

- Developed a full-stack academic application for GPA/CGPA calculations and result management.
- Integrated authentication, saved results, academic insights, and PDF/image export functionality.
- Designed responsive interfaces focused on practical student needs.

ZapShift — Parcel Delivery Management Application

React, Express.js, MongoDB, Firebase Authentication, React Leaflet
Live: zap-shift-mj.vercel.app | GitHub: github.com/jonaedjoshim/zap-shift-client

- Built a learning-based full-stack parcel delivery application with role-oriented workflows.
- Integrated Firebase Authentication and MongoDB-backed application features.
- Implemented an interactive map interface using React Leaflet.

NoxCodec — Morse Code Terminal

React, Vite, Tailwind CSS
Live: noxcodec-morse-code-terminal.vercel.app | GitHub: github.com/jonaedjoshim/noxcodec-morse-code-terminal

- Developed a terminal-inspired Morse code encoder and decoder with real-time conversion.
- Implemented audio signals and copy/share functionality.
- Created a responsive frontend-only experience.
